OUR FIRST PIECE

O VATION

Design, in sight. The rest, concealed.

TELEVISION LIFT CREDENZA

BUILT IN INDIO, CALIFORNIA

A CREDENZA WITH A TELEVISION INSIDE.

A low credenza with a motorized television lift inside and a full-width printed artwork on the front. Two sizes. Four finishes. Eighteen artworks, or upload your own. Built in Indio, California.

THE MECHANISM

UP IN SECONDS. GONE IN SECONDS.

Press the remote, or a button in the app, and the lid lifts, the television rises to viewing height, and the lid settles above it. Press again and the sequence reverses. Closed, there is no sign a screen was ever there.

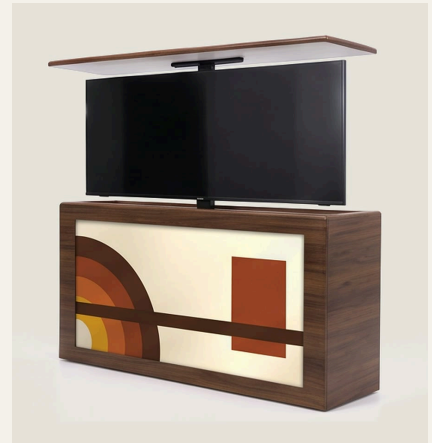

CLOSED

A credenza with a painting on the front.

OPEN

The television at viewing height, cables inside.

SIDE VIEW

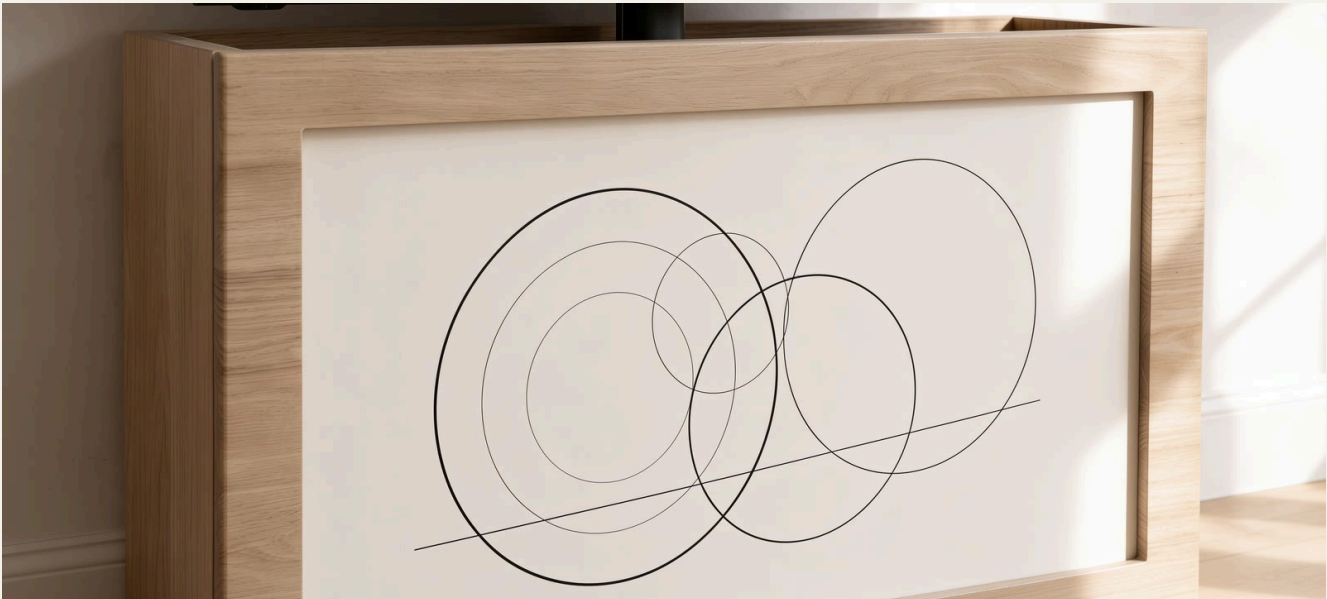

The lid rides above the screen, clear of the picture.

MATERIALS

FOUR FINISHES.

Ovation is built from Egger engineered wood panels, made from sustainably sourced timber. The panels are wrapped in a seamless 3D laminate that folds around every edge with no visible seam, so the cabinet holds its finish and its shape through years of the lift cycling inside it.

EIGHTEEN ARTWORKS, OR YOURS.

The front of every Ovation is a printed canvas panel. Choose one of eighteen artworks, or upload a photograph, painting, or print of your own and we print it across the full panel for \$75. A person here checks every file before it goes to print.
